

PRINCIPLES AND PRACTICE OF MEDICAL DEVICE CLASSIFICATION

Foreword	3
Preface	4
Glossary	5
1. Introduction	14
2. Principles of Classification	16
2.1 Differences Between a Classification and a Taxonomy.....	18
2.2 Differences Between a Taxonomy and an Ontology.....	18
2.3 Differences Between a Classification and an Ontology.....	19
2.4 Application of Classification.....	19
2.5 Classification as a Verb, not a Noun.....	19
2.6 Classification as a Set of Categories.....	19
2.7 Ontological Framework for Conceptual Modelling.....	20
2.8 Classification and Knowledge.....	20
2.9 Classification Rules.....	21
2.10 Direct and Combinatory Grouping.....	22
2.11 Classification of Medical Devices.....	23
2.12 Basic Concepts.....	28
2.13 History of Classification in Medical Device Regulation.....	30
2.14 Advantages and Disadvantages of Classification.....	30
2.15 Substruction.....	31
2.16 Reduction.....	32
2.17 Approaches to Medical Device Classification.....	34
2.18 Classification Terms.....	35
2.19 Use of Anatomy.....	36
2.19 Device Subcategory.....	41
2.20 Generic Device Group.....	41
2.21 Development of Classification Rules.....	41
3. Classification According to Directive 93/42/EEC	43
3.1 Stability.....	44
3.2 Compatibility with Computer Modelling.....	44
3.3 Flexibility.....	44
3.4 Optimisation of Items and Structure.....	44
3.5 Notation.....	45
3.6 Review and Development.....	45
3.7 Requirements for Classification of Medical Devices.....	45
3.8 Whose Job is it to Classify Medical Devices?.....	46
3.9 Definitions.....	46
3.9.1 Classification.....	47
3.9.2 Duration of Contact.....	47
3.9.3 Mode of Contact.....	47
3.9.4 Other Terms.....	48

3.9.5	Location	50
3.10	Regulations	50
3.10.1	Article 9	50
3.10.2	Disputes.....	51
3.10.3	Changes to the Classification Rules.....	51
3.11	Annex IX.....	52
3.11.1	Packs	53
3.12	Process	53
3.12.1	Is it a Medical Device?.....	54
3.12.2	Intended Purpose	56
3.12.3	Applying the Rules.....	56
3.13	Other Requirements	56
3.13.1	Classification Records.....	56
3.14	Changes that may Affect Classification of a Medical Device	56
3.15	Use of Output of Classification	56
3.16	Implications of Classification for the Manufacturer	57
3.17	Classification Errors/Troubleshooting	57
3.18	Class Distinction.....	58
3.19	Comments on Selected Cases	59
4.	Application of EC Product Classification	73
4.1	Modes of Compliance	74
4.2	Annex IX – Classification Criteria.....	74
4.3	Disputes in the Classification of a Device – The UK Regulations.....	75
4.4	What Routes are Available.....	75
4.5	QMS Elements for Product Classification.....	75
4.6	Modification of Classification System in Directive 93/42/EEC.....	75
4.7	Elements Required in a Procedure for Classification	75
4.8	Authority for Determination of Factors Relevant to EC Product Classification of Medical Devices and Legal Status of MEDDEV Guidance.....	77
5.	Comparison of Selected Classification Systems for Medical Device Regulation	81
	Bibliography.....	95
	Appendix I. Annex IX to Directive 93/42/EEC (as amended)	98
	Appendix 2. Australian Therapeutic Goods (Medical Devices) Regulations 2002	105
	Appendix 3. Canadian Medical Devices Regulations	113
	Appendix 4. Provisions for Medical Device Classification in China.....	118
